Summary

Data Science graduate with hands-on experience in NLP, LLM integration, and analytics dashboarding. Delivered impactful AI solutions during internships using Python, SQL, and Power BI, enabling automation and data-driven insights at scale. Proven academic excellence and leadership in technical and community initiatives. I am passionate about transforming data into intelligent solutions that solve business challenges and drive innovation.

Experience

1/9/2025 – Present
Subang Jaya

Data Scientist

Daythree Business Services
AI Team | Digital Transformation Department

- Built end-to-end AI workflows using n8n, integrating APIs and databases to automate operational processes:
 - Resume Analyzer using OCR + NLP to extract, classify, and score candidate profiles.
 - LLM-powered Agent Chatbots for internal knowledge assistance and operational support.
 - Automated Transcription & Insight Pipelines for QA and performance analysis.
 - Web scraping pipelines for structured data ingestion into analytics systems.
- Implemented LLM-based automation, production-grade AI use cases and data extraction solutions to support QA, Operations, and customer experience teams.

3/3/2025 – 22/8/2025
Subang Jaya

Data Scientist Intern

Daythree Business Services
AI Team | Digital Transformation Department

- Analyzed CRM tickets, customer queries, agent responses, and QA transcripts to identify intent patterns, inefficiencies, and AI automation opportunities.
- Assisted in developing NLP and LLM-based solutions (BERT, zero-shot classification, prompt engineering) for ticket routing, transcript analysis, and DSAT detection.
- Developed and optimised a Smart Traffic, a routing system using multi-criteria algorithms that improves agent assignment efficiency under real-time operational constraints.

Educational Background

10/2022 – 8/2025
Kuala Lumpur

Bachelors of Operations Research with Data Science

National Defence University of Malaysia

- Cumulative CGPA : 3.91
- Dean's List: Sem 1 - Sem 5

07/2021 – 05/2022
Perak

Matriculation

Perak Matriculation College, Gopeng

- Cumulative CGPA : 3.96
- Malaysian University English Test (MUET) : Band 5

Projects

Smart Assignment System

- Designed an intelligent task routing system using rule-based algorithms and customer-agent matching logic.
- Increased assignment accuracy by 35% and reduced wait times by 20%.

QA DSAT Scrubbing Using LLM

- Developed a pipeline leveraging OpenAI's GPT-4 to identify and extract low-satisfaction cases from QA transcripts.
- Achieved 92% accuracy in DSAT classification and automated weekly scrubbing reports.

Smart Ticket Routing Bot (NLP-Powered)

- Built a prototype to classify incoming CRM tickets based on customer intent using NLP (SpaCy, Scikit-learn).
- Enabled routing automation based on ticket scenario, improving triage time by 40%.

CRM System Tester & Analyst

- Served as functional tester and analyst during CRM module revamp.
- Created test cases, documented bugs, and worked closely with developers for issue resolution.

Dashboard & Data Visualization for Large Datasets

- Cleaned, aggregated, and visualized customer feedback using Power BI and Pandas.
- Enabled the QA and Customer Ops teams to identify trends across 10k+ records.

Skills

Programming & Development

Python (Pandas, NumPy, Scikit-learn, OpenCV), R, SQL, Flask, JavaScript, Matlab, SQL

Machine Learning & AI

Predictive Modeling, NLP, LLM Integration, ARIMA, LSTM, Prompt Engineering

Tools & Visualization

Power BI, Matplotlib, Seaborn, Git, Dash, Plotly

Blockchain Technology

Designing and Implementing secure Blockchain solutions and protocols.

Operations Research

Mathematical modeling, Linear and Integer Programming, Network Flow Optimization.

Soft Skills

Analytical Thinking, Communication, Team Collaboration, Problem Solving, Dedication

Languages

English

Bahasa Malaysia

Tamil

Achievements

Anugerah Badan Pelajar Program Sukan dan Rekreasi Terbaik

- Awarded for exemplary leadership and outstanding contribution to sports programs.

Top 6, Top Coders 2024 National Finals

- Secured a national-level position in a competitive programming event.

Bronze Medal, Defence, Security, and Sustainability Exhibition (DSS 2024)

- Recognized for exceptional project contribution.

Dean's List for entire academic semesters

- Consistently honored for academic excellence across all semesters.
